

Australian Professional Standards for Teachers explained

In a series of one hour workshops, participants will unpack the descriptors of each Standard, relating them to teaching practice in a common sense and professional manner.

Participants will:

- decode the language of the Standards
- learn how to relate them to your practice as a teacher
- reflect upon how different teacher roles (such as careers counsellors, librarians, 1:1 or 1: small group teachers and non teaching executive) can still address the Standards.
